**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 3/3/06 has been entered.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 7-8, 13, 16, 18-19, and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 3426612.

DE 34 26 612 discloses all the limitations of the instant claims including: a master cylinder including a housing and at least two pressurizing pistons (forming an integral unit 1) which are fluid-tightly and slidably fitted in the housing and which cooperate with

Art Unit: 3683

the housing to define at least two pressurizing chambers (6-8) which are isolated from each other, and wherein a working fluid in each of the at least two pressurizing chambers is pressurized by an advancing movement of a corresponding one of the at least two pressurizing pistons, a hydraulically operable brake cylinder (near 12) for activating a brake, and a valve device (13-14) having a first state in which the pressurized fluid is delivered from the two pressurizing chambers to the brake cylinder (valves actuated), and a second state (valves un-actuated) in which the pressurized fluid is delivered from only one of the two chambers to the brake cylinder and the fluid is permitted to be discharged from the other of said two pressurizing chambers but none of the fluid discharged from the other of the two pressurizing chambers is permitted to be delivered to said brake cylinder.

Regarding claim 13, valves 13-14 also functions as a cut-off valves.

Regarding claim 22, assisting device 10 functions to boost pressure above that of the master cylinder.

### ***Allowable Subject Matter***

Claims 25-36 and 42-43 are allowed.

Claims 2, 9-12, 14, 15, 17, 21-24, and 46-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Response to Arguments***

Applicant's arguments filed 03/03/2006 have been fully considered but they are not persuasive.

Regarding DE 3426612, it is maintained the rejection is proper. It is maintained that antilock braking is readable upon a "normal" braking operation as the braking operation can take place when the system is functioning properly. There also does not appear to be any specific definition for "normal braking" provided in the disclosure. It is maintained that a brake system that functions without fault can be considered normal.

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bradley T. King whose telephone number is (571) 272-7117. The examiner can normally be reached on 11:00-7:30 M-F.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James McClellan can be reached on (571) 272-6786. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
